

See your doctor in the comfort of home.
No waiting rooms. No travel issues. No stress.

A better way to receive expert medical care.

We will treat you in the most comfortable exam room of all — home sweet home. We see patients from 3 to 103, and regardless of your age or ailment, we can help you get the care you need, when and where you need it. From an annual physical exam to treatment for an urgent or acute medical problem to blood draws, EKGs, X-rays, and ultrasounds — it's all done in the home. **Your** home.

- Get all the services you expect from a regular physician's office without the waiting, the exposure to other sick people or the hassle of traffic, parking, and travel time.
- Experience a doctor's appointment with no time limits, where your clinician will spend as much time with you as is needed and take an ongoing and active role in your day-to-day health and well-being.
- Bring the best in comprehensive care to those with medical issues that make it difficult to travel, or to family members or young children who otherwise would not be able to get to the doctor.
- Give your clinician a complete view of your home environment allowing them to more effectively assess any lifestyle factors – medication management, fall hazards, allergens, and toxins, etc. – that may lead to more informed medical decisions.
